Revitalize Your Skin from the Inside Out

Brand Vision

DERMAQUAL is a promise of:

Q U A L I T Y

Dermaqual is a Paris-based laboratory specialized in the Aesthetic & cosmetic solutions.

It has been established by specialized doctors and veteran scientists with extensive experience in related practices and protocols to meet the needs and requirements of professionals in supplying mesotherapy cocktails and solutions.

With its top-of-the-notch world-class scientists leading innovations and designing ideal formulas for all cosmetic treatments and aesthetic applications, Dermaqual ensures unrivaled quality for the physicians' best practices and satisfactory results.

R E L I A B I L I T Y

The unprecedented successes Dermaqual has witnessed since its creation have contributed to spreading its reputation in terms of credibility, sustainability, and effectiveness beyond Europe, allowing it to move its activity to a global scale, making its cumulative experience, services, and products available for doctors from all over the world.

I N N O V A T I O N

Dermaqual products portfolio offers unique and innovative offerings in mesotherapy, Dermal fillers, PRP, PDO Threads, devices, and supplements. This technological development allows it to integrate between cosmetic requirements and desired beauty results within advanced medical and scientific protocols that guarantee the continuity and durability of treatments.

DERMAQUAL REJUVENATION SERIES

For those seeking rejuvenation that's more than skin-deep, reach for Dermaqual Rejuvenation mesotherapy collection; not only does it work to reduce the appearance of all the major visible signs of ageing, it also helps support the underlying structure of skin.

EGF GENESIS®

EGF GENESIS® is a skin rejuvenating cocktail with intensive antiaging and lifting effects. Its exclusive formula is based on **high-complex concentrations of growth factors** (low-molecular-weight polypeptide) with contributing poly-revitalizing ingredients: sodium DNA, ferulic acid, ubiquinone (coenzyme Q10), ceramide, and amino acid-hydrolyzed wheat protein. EGFs are proteins that promote and enhance biochemical pathways to regenerate skin tissue. They do this by interacting with skin cells to produce more collagen and elastin at a cellular level. Sodium DNA plays a significant role in stimulating cell repair. As an exfoliating agent, it helps improve the complexion and maintain a balanced pH. EGF GENESIS® helps achieve the best results in skin rejuvenating, hydrating, firming, and tightening after only a few sessions.

COMPOSITION

AQUA / WATER, SODIUM CHLORIDE, SODIUM DNA, SODIUM PHOSPHATE, TRIETHANOLAMINE, PEG-8, FERULIC ACID, PEG-40 HYDROGENATED CASTOR OIL, PROPANEDIOL, UBIQUINONE, BUTYROSPERMUM PARKII BUTTER, CERAMIDE NP, HYDROLYZED WHEAT PROTEIN, LECITHIN, OLEA EUROPAEA FRUIT OIL, PHYTOSTEROLS, SQUALANE, SODIUM LACTATE

PRESENTATION

Each box contains 5 sterile x 10 ml/0.34 fl. oz. vials.

EPIDERMAL GROWTH FACTOR STEM CELL COCKTAIL

COLLAGEN ACTIVATOR STEM CELL CELLULAR REPAIR

Mesotherapy in 3 stages

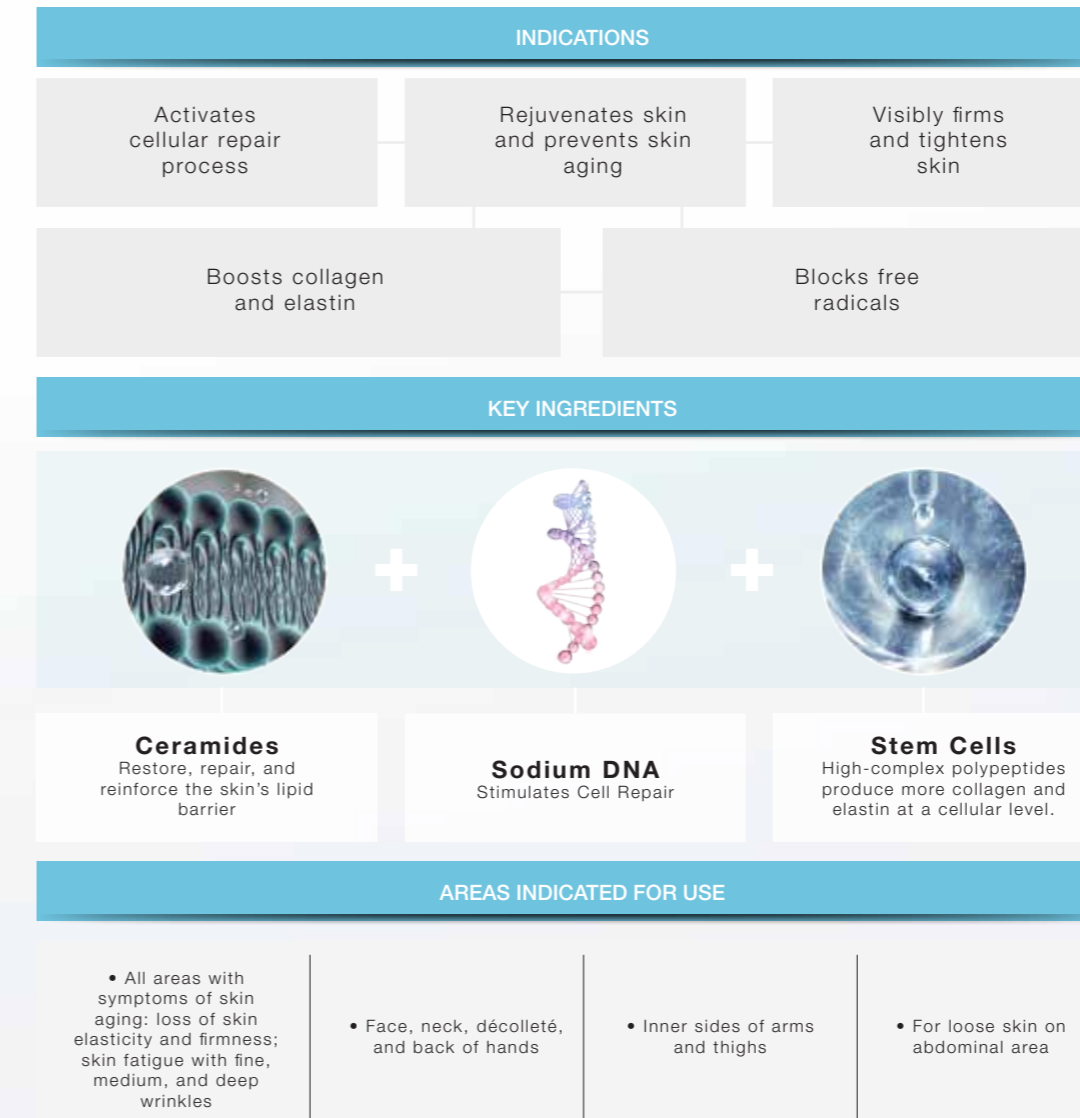

- STAGE 1—REBUILD**
4 sessions, intervals of 1 week to 15 days
- STAGE 2—STABILIZE**
2 sessions, once a month
- STAGE 3—MAINTAIN**
4 sessions with 3-month intervals

CASE REPORT

To achieve expected outcome, **EGF GENESIS®** mesotherapy requires a minimum of 6 sessions over 3 months plus 4 maintenance sessions.

• *After cleansing the skin, apply to the face, neck, décolletage, and all areas in need of meso-treatment. The cycle may be repeated on a monthly basis. The average volume used per session is 5–10 ml.*

EPIDERMAL GROWTH FACTOR STEM CELL COCKTAIL

COLLAGEN ACTIVATOR STEM CELL CELLULAR REPAIR

Mesotherapy in 3 stages

STAGE 1—REBUILD

4 sessions, intervals of 1 week to 15 days

STAGE 2—STABILIZE

2 sessions, once a month

STAGE 3—MAINTAIN

4 sessions with 3-month intervals

CASE REPORT

To achieve expected outcome, **EGF GENESIS®** mesotherapy requires a minimum of 6 sessions over 3 months plus 4 maintenance sessions.

• *After cleansing the skin, apply to the face, neck, décolletage, and all areas in need of meso-treatment. The cycle may be repeated on a monthly basis. The average volume used per session is 5–10 ml.*

INDICATIONS

Activates cellular repair process

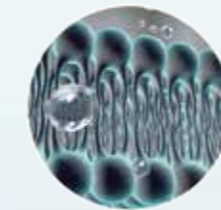

Rejuvenates skin and prevents skin aging

Visibly firms and tightens skin

Boosts collagen and elastin

Blocks free radicals

KEY INGREDIENTS

Ceramides
Restore, repair, and reinforce the skin's lipid barrier

Sodium DNA
Stimulates Cell Repair

Stem Cells
High-complex polypeptides produce more collagen and elastin at a cellular level.

AREAS INDICATED FOR USE

• All areas with symptoms of skin aging: loss of skin elasticity and firmness; skin fatigue with fine, medium, and deep wrinkles

• Face, neck, décolleté, and back of hands

• Inner sides of arms and thighs

• For loose skin on abdominal area

DQ HA 35®

DQ HA35® is an ultraconcentrated formula of noncrosslinked hyaluronic acid, formulated to minimize the appearance of fine lines, wrinkles, and pores; firm sagging skin; and restore skin's plumpness. Its ability to attract and bind water molecules serves to moisturize the skin and maintain the elasticity of dermal and epidermal tissue. It works to hydrate parched skin, combat uneven skin tone, and promote surface-cell renewal, revealing a younger-looking, smoother complexion with revived radiance. This professional formula's surface-filling and firming technologies instantly lift, firm, and reduce the appearance of aging and stimulate the synthesis of natural hyaluronic acid in the skin. DQ HA35®, created by Dermaqual, **holds the market title as most generous concentration of hyaluronic acid: 35 mg/ml.** The application of this product may be done topically to lift, firm, and visibly reduce signs of aging. The extraordinary features of Dermaqual's ultraconcentrated formula (3.5%) and **compound purity (free of BDDE)** make the product the best go-to alternative for beautician and aesthetic specialists.

COMPOSITION

AQUA/WATER, SODIUM HYALURONATE (HYALURONIC ACID), SODIUM CHLORIDE, DISODIUM PHOSPHATE, SODIUM PHOSPHATE

PRESENTATION

Each box contains 5 sterile x 5 ml/0.17 fl. oz. vials.

ULTRACONCENTRATED HYALURONIC ACID 3.5%

DQ HA35® can be used in all areas with symptoms of skin aging:

- loss of skin elasticity and firmness; skin fatigue with fine, medium, and deep wrinkles
- Face, neck, décolleté, and back of hands

24 Points with **DQ HA35®** is new potential synergic treatment associated to a dermal anti ageing biorevitalization for skin rejuvenation & lifting. **DQ HA35®** is therefore a non-cross-linked HA for boosting the skin anti-age regeneration, lifting, hydration.

DRATION BOOSTER RESTORING SKIN ELASTICITY

Mesotherapy in 3 stages

STAGE 1—REBUILD

4 sessions, intervals of 1 week to 15 days

STAGE 2—STABILIZE

2 sessions, once a month

STAGE 3—MAINTAIN

4 sessions with 3-month intervals

CASE REPORT

To achieve expected outcome, **DQ HA35®** mesotherapy requires a minimum of 6 sessions over 3 months plus 4 maintenance sessions.

• *After cleansing the skin, apply to the face, neck, décolletage, and all areas in need of meso-treatment. The cycle may be repeated on a monthly basis. The average volume used per session is 5–10 ml.*

DQ HA35® 24 Points

(Z) zones represents the full face guideline for 24 Points Treatment

• Z(1) Frown and Glabellar lines	• Z(2) Crow's feet	• Z(3) Cheekbones	• Z(4) Nasolabial folds
• Z(5) Jawline	• Z(6) Marionette lines (Mental) -Jowl	• Z(7) Depressor labii l. zone -Jowl	• Z(8) Chin

INDICATIONS

Diminishes fine lines, wrinkles, and pores	Intensifies skin rejuvenation	Restores lost collagen
Enhances skin's elasticity	Firms sagging skin and restores plumpness	

MESOGLOW®

MESOGLOW® is an innovative **reverse-aging ultimate glowing cocktail**. The exceptional formula provides a **long-lasting lifting effect and perfectly balanced skin tone**. A combination of low molecular hyaluronic acid, DMAE, sodium DNA, and silanetriol penetrates the dermis, giving the skin a youthful appearance, extreme hydration, and improved elasticity. MESOGLOW® acts topically at three levels: it increases the release of acetylcholine, helps skin tissue retain water, and synthesizes collagen and dermal GAGs. This cocktail stimulates collagen and elastin production, gives a glow to the skin, and slows the signs of aging. Make this radiance-boosting complexion cocktail your new secret weapon.

COMPOSITION

AQUA/WATER, DIMETHYLAMINOETHANOL TARTRATE (DMAE), SODIUM HYALURONATE (HYALURONIC ACID), SODIUM HYDROXIDE, SODIUM DNA, SILANETRIOL, POTASSIUM SORBATE, SODIUM BENZOATE

PRESENTATION

Each box contains 5 sterile x 5 ml/0.17 fl. oz. vials.

REVERSE-AGING ULTIMATE GLOWING COCKTAIL

FRENCH TOUCH FOR LIFTING AND GLOWING EFFECT

Mesotherapy in 3 stages

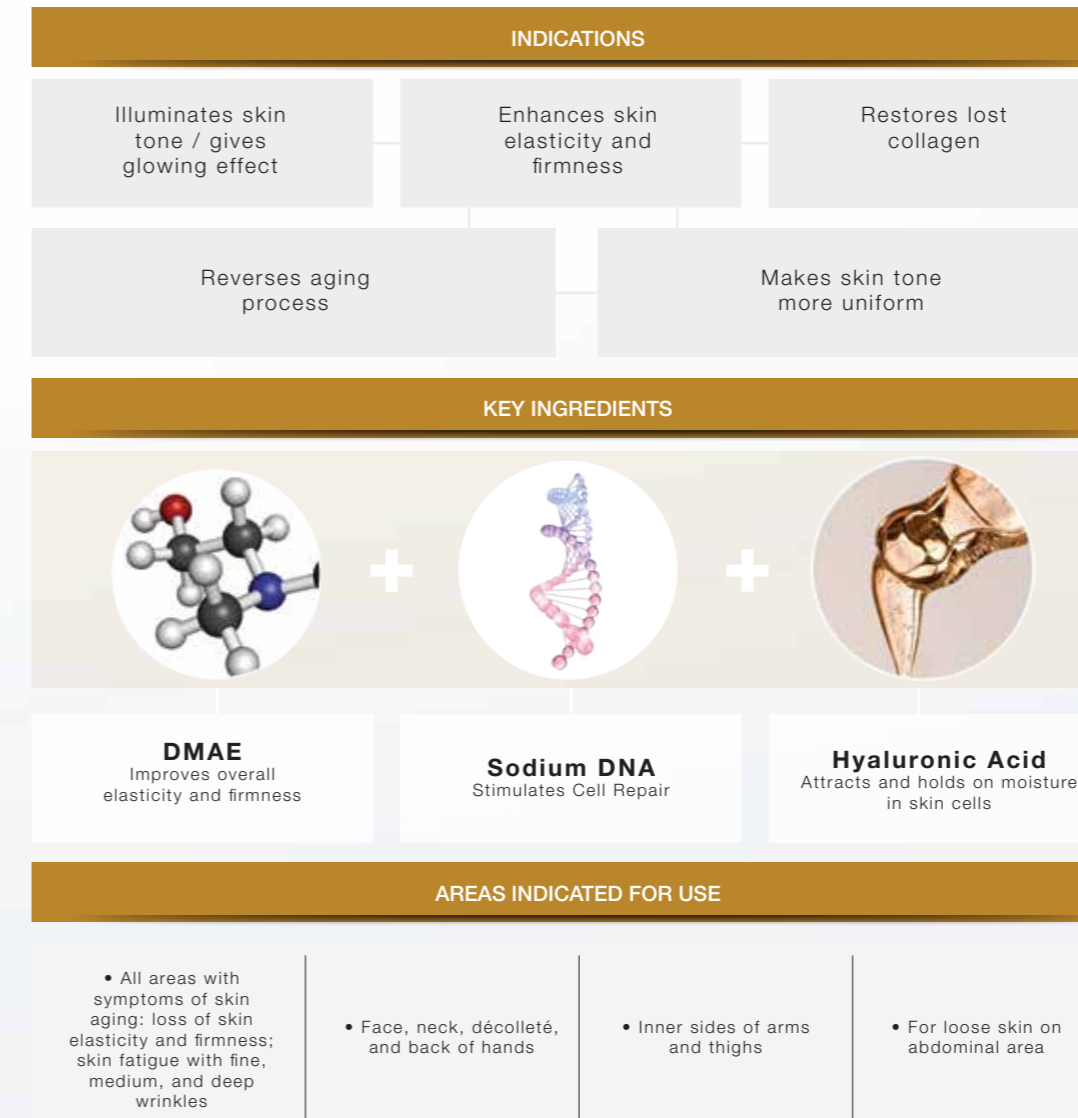

- STAGE 1—REBUILD**
4 sessions, intervals of 1 week to 15 days
- STAGE 2—STABILIZE**
2 sessions, once a month
- STAGE 3—MAINTAIN**
4 sessions with 3-month intervals

CASE REPORT

To achieve the expected outcome, **MESOGLOW®** mesotherapy requires a minimum of 6 sessions over 3 months plus 4 maintenance sessions.

•After cleansing the skin, apply to the face, neck, décolletage, and all areas in need of meso-treatment. The cycle may be repeated on a monthly basis. The average volume used per session is 5 ml.

REJUVEYES®

REJUVEYES® is an advanced meso-cocktail formulated to address undereye concerns. Featuring skin-loving hyaluronic acid and a complex of Treeptides, **REJUVEYES® reinforces the firmness and tone of the eye area and increases collagen production, circulation, and capillary function.** This triple-action treatment smooths and brightens the eye area; reduces puffiness, dark circles, and wrinkles; and moisturizes and firms the skin. It comes packed with all the ingredients needed to banish undereye bags and dark circles: chrysin activates the elimination of dark circles and local inflammation, and ginkgo biloba and cynara scolymus leaf extract reduce blood viscosity by inhibiting platelet-activating factor and improving vascular tone and microcirculation. Troxerutin reduces capillary fragility and permeability and is vasoprotective.

COMPOSITION

AQUA / WATER, ALCOHOL, PROPYLENE GLYCOL, BUTYLENE GLYCOL, GLYCERIN, MAGNESIUM ASCORBYL PHOSPHATE, SODIUM HYALURONATE (HYALURONIC ACID), STEARETH-20, COUMARIN, TROXERUTIN, CYNARA SCOLYMUS LEAF EXTRACT, GINKGO BILOBA LEAF EXTRACT, POTASSIUM SORBATE, METHYLSILANOL MANNURONATE, CLORHEXIDINE DIGLUCONATE, N-HYDROXSUCCINIMIDE, PHENOXYETHANOL, CHRYSIN, PALMITOYL TRIPEPTIDE-1, ACETYL TETRAPEPTIDE-5, PALMITOYL TETRAPEPTIDE-7, SORBIC ACID

PRESENTATION

Each box contains 5 sterile 5 ml/0.17 fl. oz. vials.

ADVANCED PEPTIDE COMPLEX + HA COCKTAIL

ERASES DARK CIRCLES FINE LINES & WRINKLES

INDICATIONS

Erases the appearance of undereye dark circles

Diminishes signs of tiredness and puffy eyes

Smooths frown lines and crow's feet
Rebuilds collagen and elastin

Prevents dryness and dehydration

Increases firmness and elasticity

KEY INGREDIENTS

Treeptides Complex
Reinforces collagen and lumican improves skin thickness and leaves it plumper

Hyaluronic Acid
Moisturizes and rejuvenates the sensitive eye area

Ginkgo Biloba
Potent Antioxidant, alleviates and addresses signs of fatigue

AREAS INDICATED FOR USE

- Under and around the eyes

Mesotherapy in 3 stages

STAGE 1—REBUILD

4 sessions, intervals of 1 week to 15 days

STAGE 2—STABILIZE

2 sessions, once a month

STAGE 3—MAINTAIN

4 sessions with 3-month intervals

CASE REPORT

To achieve the expected outcome, **REJUVEYES®** mesotherapy requires a minimum of 6 sessions over 3 months plus 4 maintenance sessions.

• *After cleansing the skin, apply under and around the eye contour area (on the upper and lower lids). The cycle may be repeated on a monthly basis. The average volume used per session is 2–5 ml.*

NEFERTITI LIFT®

NEFERTITI LIFT® is the first product specifically designed for a **non-surgical face and neck-lifting treatment**. This firming meso-cocktail instantly hydrates, tightens, and sculpts the face and neck area and lifts and refines the décolleté and neckline. DMAE is highly active as an antioxidant and has antiaging benefits. It is characterized by its ability to improve sagging skin. Silanetriol (organic silicon) regenerates the epidermal fibers. The formula helps rebuild natural collagen, promotes cellular nutrition, boosts cell turnover, and improves elasticity. NEFERTITI LIFT® has an uplifting effect on the face, neck, and décolletage. It's an excellent adjuvant in antiaging therapy to fight against signs of fatigue.

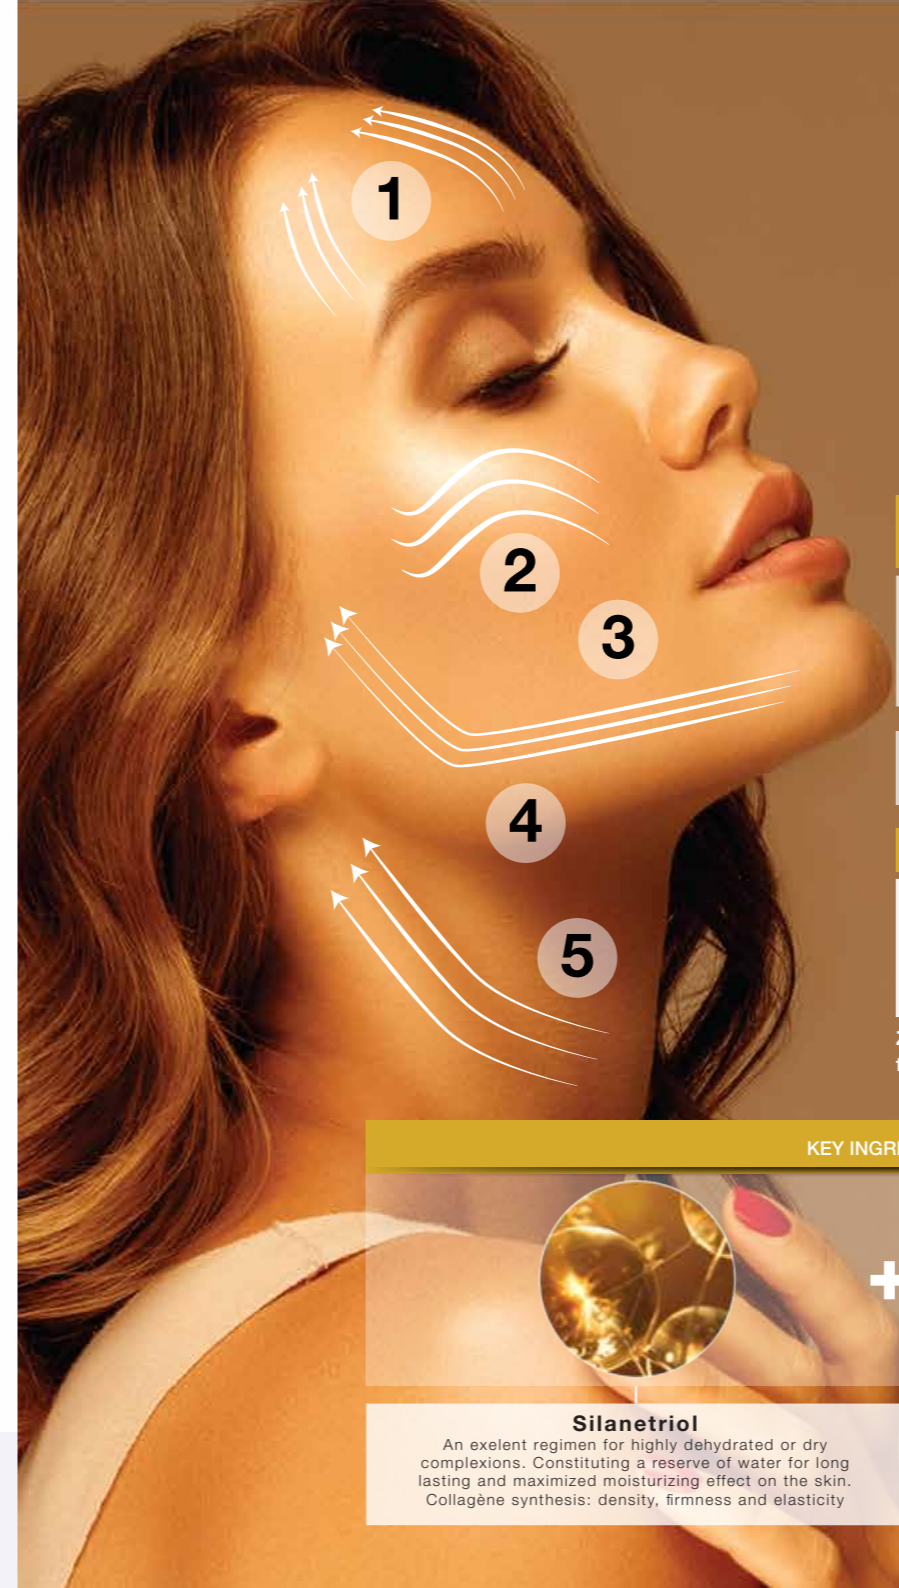

COMPOSITION

AQUA/WATER, DIMETHYLAMINOETHANOL TARTRATE (DMAE), SODIUM CHLORIDE, SODIUM HYDROXIDE, SILANETRIOL (ORGANIC SILICON), POTASSIUM SORBATE, SODIUM BENZOATE

PRESENTATION

Each box contains 5 sterile 5 ml/0.17 fl. oz. vials

ADVANCED FACE- AND NECK-LIFTING COCKTAIL

NON-SURGICAL JAWLINE DEFINITION / FACE & NECK LIFT

Mesotherapy in 3 stages

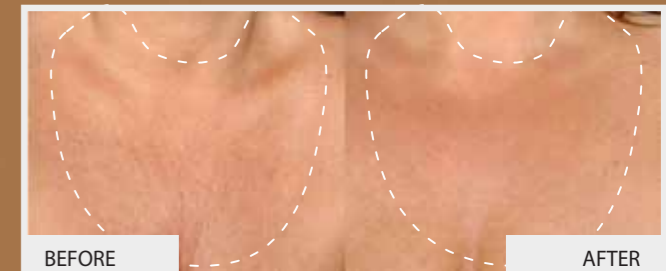

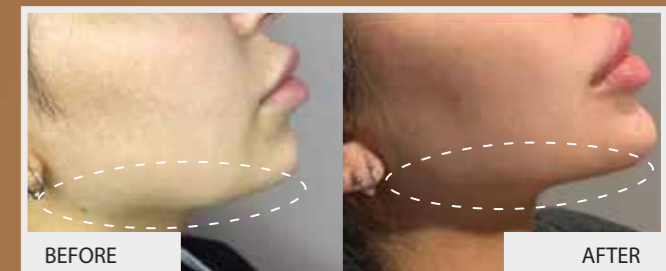

- STAGE 1—REBUILD**
4 sessions, intervals of 1 week to 15 days
- STAGE 2—STABILIZE**
2 sessions, once a month
- STAGE 3—MAINTAIN**
4 sessions with 3-month intervals

INDICATIONS		
Lifts skin of face and neck and defines jawline	Hydrates and makes skin's tone more uniform	Enhances skin's elasticity and firmness
Reverses aging process	Restores lost collagen	
AREAS INDICATED FOR USE		
<ul style="list-style-type: none"> All areas with symptoms of skin aging: loss of skin elasticity and firmness 		<ul style="list-style-type: none"> Face, neck, décolleté, and back of hands

Zones represents the full face guideline for Nefertiti Lift Treatment

KEY INGREDIENTS	
 <p>Silanetriol An exelent regimen for highly dehydrated or dry complexions. Constituting a reserve of water for long lasting and maximized moisturizing effect on the skin. Collagène synthesis: density, firmness and elasticity</p>	 <p>DMAE Protect skin-cell membranes from free-radical damage, while firming, smoothing and brightening the complexion.</p>

CASE REPORT

To achieve expected outcome, **NEFERTITI LIFT®** mesotherapy requires a minimum of 6 sessions over 3 months plus 4 maintenance sessions.

• After cleansing the skin, apply to the face, neck, and décolletage. The cycle may be repeated on a monthly basis. The average volume used per session is 5 ml.

WHITENING

M E S O S E R I E S

DERMAQUAL BRIGHTENING PRODUCTS

Advanced mesotherapy series addresses the look of uneven skin tone and pigmentation for a beautifully balanced appearance.

GSH + C1000®

Rediscover bright, even-toned skin with **GSH + C 1000®**, an antioxidant and intensive **whitening cosmetic treatment that helps fight pigmentation**. It combines a concentrated dose of active brightening ingredients: the amino acid glutathione with pure ascorbic acid. Infusing these two powerful agents helps biologically reduce the production of melanin while boosting cell renewal for a unified and brightened complexion. Activated vitamin C is incredibly potent to remove existing dark spots and to prevent the formation of new skin discolorations. Protected from oxidative stress, the skin has a healthier and smoother appearance. The result is a long-lasting, radiant complexion with a visible whitening effect.

COMPOSITION

ASCORBIC ACID (VITAMIN C), GLUTATHIONE, SODIUM HYDROXIDE

PRESENTATION

Each box contains 5 sterile vials of 200 mg of solid lyophilized powder of glutathione and 200 mg of ascorbic acid.

ULTRA-PURE GLUTATHIONE + VITAMIN C COCKTAIL

TARGETING PIGMENTATION AGE SPOTS & MARKS

CASE REPORT

INDICATIONS		
Whitens and brightens skin	Improves dark and/or uneven skin tone	Helps with pigmentation and age-spots Reduces appearance of lesions and melasma
Decreases freckles, discoloration, and post-acne spots and scars		Neutralizes free radicals Offers photoprotection and helps with photoaging
AREAS INDICATED FOR USE		
• All areas with symptoms of uneven pigmentation or signs of photoaging	• Face, neck, décolleté, and back of hands	• Inner sides of arms and thighs

To achieve the expected outcome, **GSH + C 1000®** mesotherapy requires a minimum of 1 session per month, up to 6 sessions over a 6-month period.

•After cleansing the skin, apply to the face, neck, décolletage, and all areas in need of meso-treatment. The cycle may be repeated on a monthly basis. The average volume used per session is 1–5 ml.

DERMAÉCLAT®

DERMAÉCLAT® is the first whitening meso-cocktail especially designed for sensitive and intimate areas. One of the most common problems that affects women, especially dark color of sensitive areas, such as the bikini area and the armpit. The main cause of hyperpigmentation in this area is inflammation, whether as a result of skin friction or sweating and bacterial infection resulting from it in these areas. This product utilizes a combination of the most powerful agents: glutathione, folic acid (vitamin B9), halidrys siliquosa extract, pueraria lobata symbiosome extract, and superoxide dismutase, which inhibits 88% of tyrosinase formation (highest of any tyrosinase inhibitor). The formula helps to lighten pigmented areas subject to friction (such as the knees, underarms, etc.), reduces dark-spot size and color depth, and restores natural skin color and tone. **DERMAÉCLAT®** is an illuminating solution with powerful antioxidant and antimelanogenic action. It acts before, during, and after melanogenesis, inhibiting melanin formation and increasing its degradation.

COMPOSITION

AQUA / WATER, GLUTATHIONE, SODIUM HYDROXIDE, FOLIC ACID (VITAMIN B9), HALIDRYS SILIQUOSA EXTRACT, PUERARIA LOBATA SYMBIOSOME EXTRACT, PENTYLENE GLYCOL, PHENOXYETHANOL, SUPEROXIDE DISMUTASE, TROMETHAMINE, SODIUM BENZOATE, POTASSIUM SORBATE

PRESENTATION

Each box contains 5 sterile 5 ml/0.17 fl. oz. vials.

PIGMENT-SENSITIVE AREA-LIGHTENING COCKTAIL

Mesotherapy in 3 stages

- STAGE 1—REBUILD**
4 sessions, intervals of 1 week to 15 days
- STAGE 2—STABILIZE**
2 sessions, once a month
- STAGE 3—MAINTAIN**
1 session with 3-month intervals

CASE REPORT

INDICATIONS			
Provides photoprotection and decreases photoaging	Prevents the reappearance of future skin pigmentation signs	Improves uneven skin tone Diminishes discolored areas	Lightens pigmented sensitive areas

AREAS INDICATED FOR USE		
<ul style="list-style-type: none"> All sensitive areas with symptoms of pigmentation or signs of photoaging 	<ul style="list-style-type: none"> Face, neck, décolleté, and back of hands Inner sides of arms and thighs 	<ul style="list-style-type: none"> Underarms, bikini area, knees, and elbows

To achieve expected outcome, **DERMAÉCLAT®** mesotherapy requires a minimum of 6 sessions over 3 months plus 1 session of maintenance.

•After cleansing the skin, apply to the sensitive areas in need of meso-treatment. The cycle may be repeated on a monthly basis. The average volume used per session is 5 ml.

ASCORBIX 20®

Activate skin's luminous glow with an intensive, non-comedogenic **ASCORBIX 20®** meso-solution, the expert formula of ascorbic acid at a concentration of 20%. ASCORBIX 20® is an antioxidant, antiaging, and brightening treatment. Suitable for all skin types and tones. Direct-acting, the purest form of ascorbic acid, is penetrating the skin's layers at a deeper level. It works by neutralizing free radicals to protect the skin from oxidative damage. **Anti-inflammatory and antioxidant actions reduce the appearance of acne, blemishes, blackheads, and enlarged pores.** It promotes clearer, brighter, and smoother skin while balancing sebum production. Ascorbic acid is an essential coenzyme for collagen and elastin biosynthesis. ASCORBIX 20® is a moisturizing and firming formula that revitalizes the skin and stimulates the natural renewal process, **addressing the most visible signs of aging such as discoloration and loss of tone and elasticity.**

COMPOSITION

AQUA/WATER, SODIUM ASCORBATE (VITAMIN C), SODIUM BICARBONATE, DISODIUM EDTA

PRESENTATION

Each box contains 5 sterile x 10 ml/0.34 fl. oz. vials.

INTENSIVE 20% VITAMIN C FORMULA

DIMINISHES EXCESS SEBUM & ACNE-RELATED SKIN CONDITIONS

Mesotherapy in 3 stages

- STAGE 1—REBUILD**
4 sessions, intervals of 1 week to 15 days
- STAGE 2—STABILIZE**
2 sessions, once a month
- STAGE 3—MAINTAIN**
4 sessions with 3-month intervals

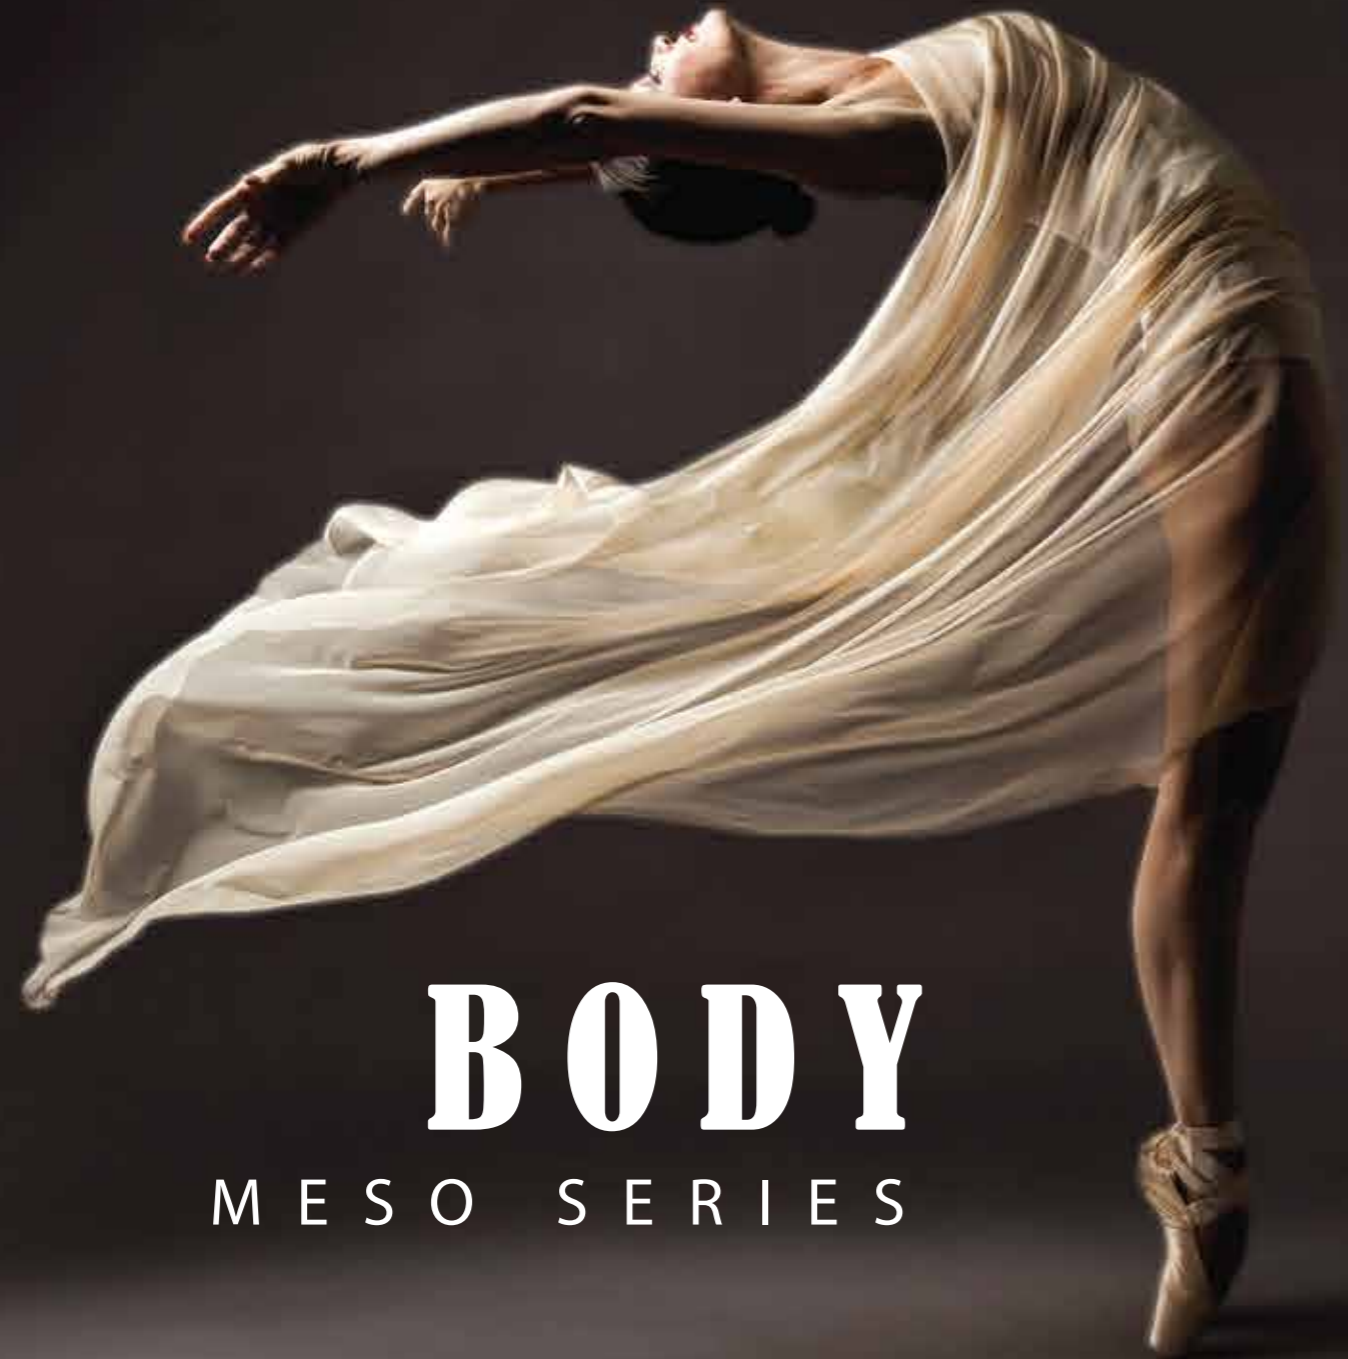

CASE REPORT

INDICATIONS		
Decreases melanin formation	Blemish-free skin / Anti-acne	Brightens skin and helps with photoaging
Antioxidant with anti-inflammatory & immune-supporting effects		Has an antiaging & biorevitalizing effect
AREAS INDICATED FOR USE		
<ul style="list-style-type: none"> All areas with symptoms of uneven pigmentation or signs of photoaging 	<ul style="list-style-type: none"> All areas with acne-prone and oily skin Face, neck, décolleté, and back of hands 	<ul style="list-style-type: none"> Inner sides of arms and thighs

To achieve the expected outcome, **ASCORBIX 20®** mesotherapy requires a minimum of 6 sessions over 3 months plus 4 maintenance sessions.

• *After cleansing the skin, apply to the face, neck, décolletage, and all areas desired for meso-treatment. The cycle may be repeated on a monthly basis. The average volume used per session is 1–3 ml.*

BODY

M E S O S E R I E S

DERMAQUAL BODY SERIES

Lipolytic mesotherapy series "inch loss" is an innovative, gentle non-surgical procedure intended to remove the accumulation of fat deposits in specific regions of the body.

L-CARNITINE®

L-CARNITINE® is an oligopeptide involved in fatty acid metabolism, biosynthesized from the essential amino acids L-lysine and L-methionine. L-Carnitine plays a vital role in lipid oxidation and energy production by transporting long-chain fatty acids to the mitochondrial matrix, where they can be oxidized ("burned") to release energy. Deficiency of L-Carnitine prevents the body from processing lipids into energy; this causes fat accumulation into the skin layer and creates cellulite. Cellulite - "orange peel" - is formed as a result of defectively functioning lymphatic system, which results in storage of leftover toxins in fat cells. L-CARNITINE® (L-CARNITINE 20%) improves microcirculation and skin tissue function. Facilitates burning the excessive amount of fat and assists the body in removing side-products (toxic ketones) of metabolism that arise after the fat breakdown process. The effect is beneficial for the lymphatic system and fat cells, proving to be a revolutionary method in the treatment of cellulite and stretch marks, restoring the skin to the toned and firm shape. L-CARNITINE® works to prevent future fat accumulation and cellulite reoccurrence.

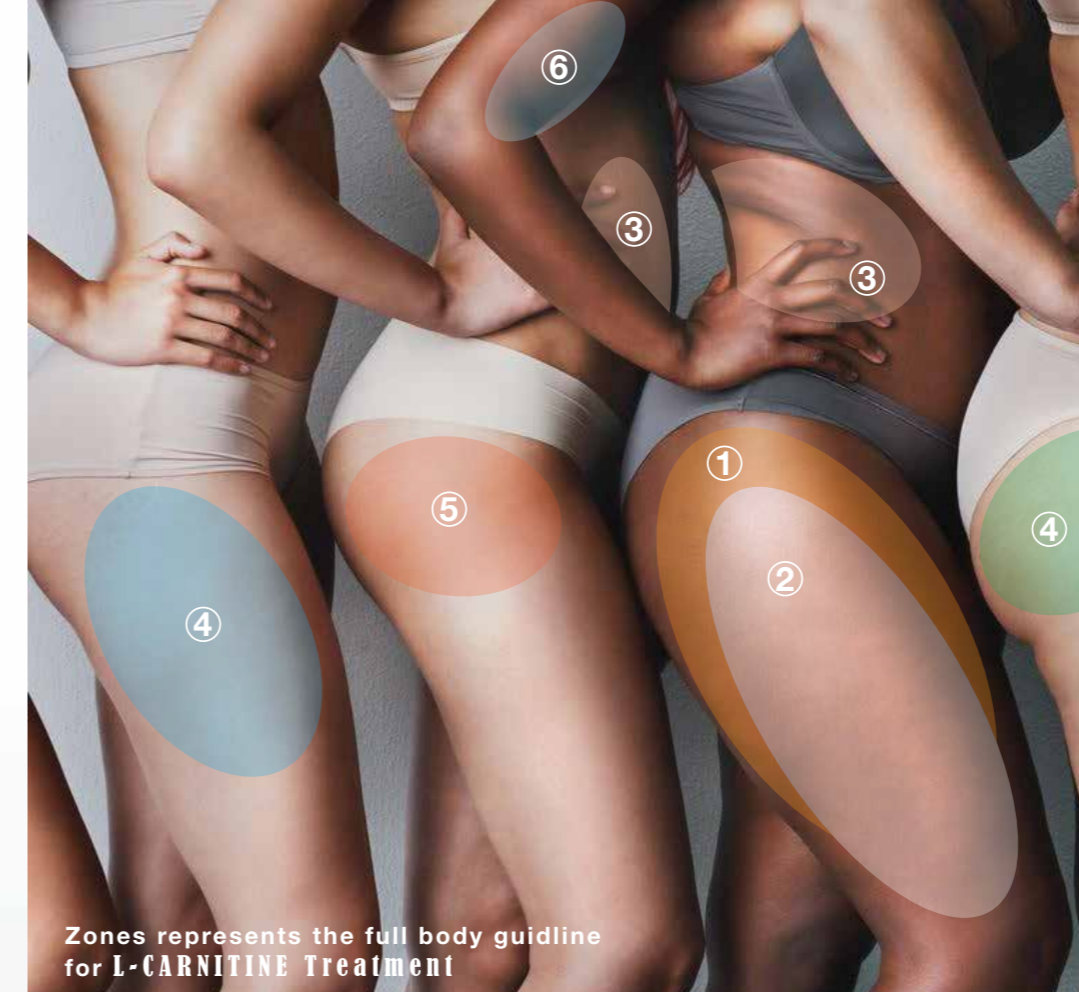

COMPOSITION

AQUA / WATER, CARNITINE, CITRIC ACID

PRESENTATION

Each box contains 5 sterile 5 ml/0.17 fl. oz. vials.

INTENSIVE DUO ANTI-CELLULITE SOLUTION

Zones represents the full body guideline for L-CARNITINE Treatment

INDICATIONS		
Refines uneven skin texture	Improves skin firmness and elasticity	Reduces the visible appearance of cellulite
Eliminates unnecessary subcutaneous water	Facilitates the burning of excess localized fat deposits	
AREAS INDICATED FOR USE		
• Oblique area and leftover fat deposits (post-liposuction correction)	• Arms, shoulders, hips, buttocks, and thighs	• Lower and upper abdomen

IMPROVES SKIN TEXTURE & REDUCES CELLULITE

Mesotherapy in 3 stages

STAGE 1—TREATMENT

8 sessions, intervals of 1 week to 10 days

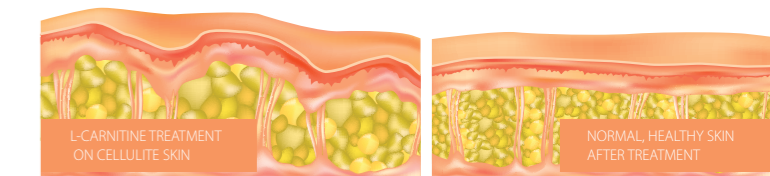

STAGE 3—MAINTAIN

4 sessions, once a month

CASE REPORT

60 DAYS AFTER FINAL TREATMENT

To achieve expected outcome, **L-CARNITINE®** mesotherapy requires a minimum of 8 sessions over 2 months plus 4 maintenance sessions.

•After cleansing the skin, apply 5 ml on desired area(s). The cycle may be repeated on a monthly basis. The average volume used per session is 5-10 ml.

SUPRÉALL®

SUPRÉALL® is a clear, colorless, and sterile **cytolytic solution indicated in the elimination of the appearance of moderate localized fat deposits**. It's a slimming cocktail that acts as an alternative to liposuction and anticellulite and fat-reducing mesotherapy. It contains deoxycholic acid, a cytolytic agent, in combination with phosphatidylcholine as the active ingredients best for submental contouring (double chin). SUPRÉALL® is a noninvasive method that acts as an alternative to liposuction (fat-reducing therapy for submental fat). It provides submental contouring without anesthesia, scars, or downtime. It permanently reduces or eliminates localized fat deposits within 12 weeks of therapy. It acts directly on fat-lipolytic substances. This treatment is ideal for fat deposits that cannot be reduced by exercise or diet. Recommendations for using SUPRÉALL® include lipomas and post-liposuction deformities. It can be used to treat depressed post-cesarean scars that are bordered by areas of protruding fat and skin-contour irregularities due to traumatic fat necrosis. SUPRÉALL® melts fat only, so it doesn't affect nerves or muscles. It destroys the fat cells naturally through a complex cascade of enzymatic reactions, resulting in apoptosis of adipocytes (programmed cell elimination). This biochemical phenomenon begins immediately after the first therapy and continues for 8 to 12 weeks.

COMPOSITION

AQUA/WATER, PHOSPHATIDYLCHOLINE, SODIUM DEOXYCHOLATE, BENZYL ALCOHOL, SODIUM CHLORIDE, SODIUM HYDROXIDE

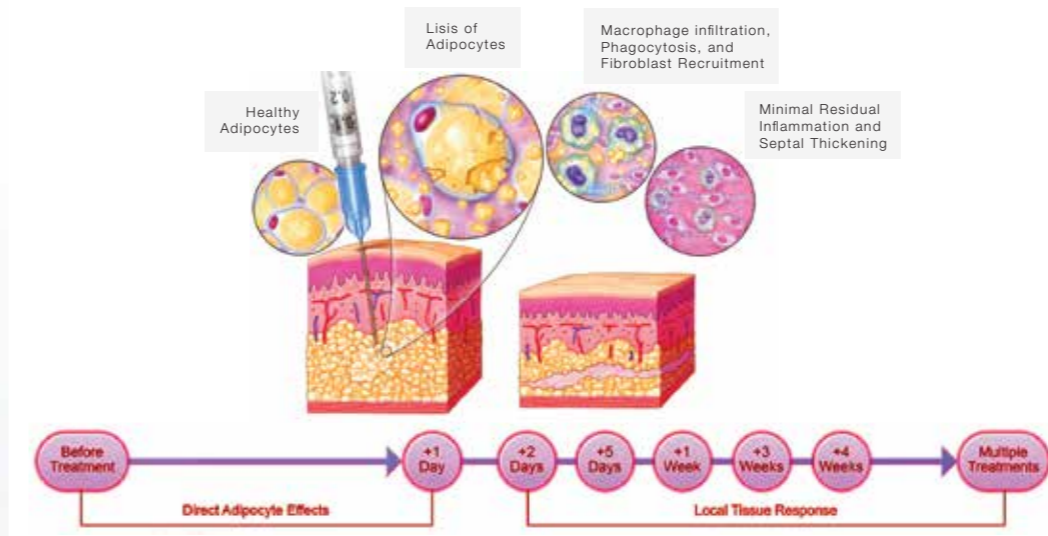

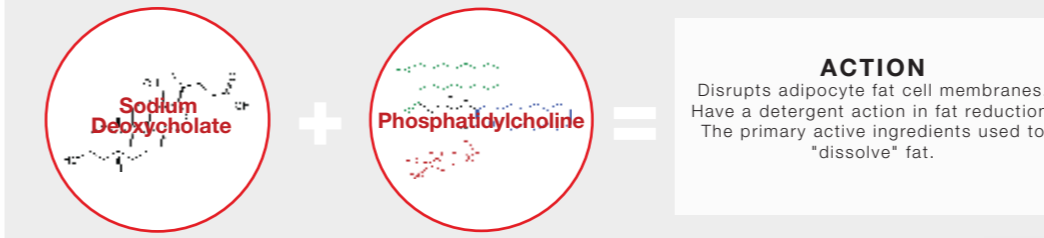

PRESENTATION

Each box contains 5 sterile x 10 ml/0.34 fl. oz. vials.

INTENSIVE DUO ANTI-CELLULITE SOLUTION

Mechanism of action of Sodium Deoxycholate + Phosphatidylcholine

INDICATIONS

- Submental contouring (double chin)
- Skin contour irregularity
- Localized fat deposits (soft, spongy fat)
- Silhouette reshaping

AREAS INDICATED FOR USE

Submental neck area and submandibular jawline

MELTS & REMOVES DOUBLE-CHIN FAT

Submental contouring

CASE REPORT

DIRECTIONS FOR USE

• *The contents of each 10 ml vial should be reconstituted by combining with 10 ml of 0.9% sodium chloride. After cleansing the skin, apply 5 ml on the desired area(s). The average volume used per session is 5–10 ml. One session per month for 3 months is recommended, and this can be repeated for an additional course if required. SUPRÉALL® should not be used on / or applied in close proximity (1–1.5 cm) to salivary glands, lymph nodes, or muscles. The cycle may be repeated on a monthly basis.*

DISOLVIDASE®

DISOLVIDASE® is a **hyaluronic acid hydrolyzer**, formulated as a white, sterile, freeze-dried meso-lyophilized powder for solution, containing 1,500 international units of the active ingredient hyaluronidase. It is indicated in the removal of the effects of hyaluronic acid fillers when an individual is not happy or satisfied with them. Hyaluronidase is an enzyme that catalyses the degradation of hyaluronic acid (HA). Facilitates the spread of fluids through tissues by lowering the viscosity of HA and that promotes the spread or dispersion of injected fillers. DISOLVIDASE® is only **used to decrease overcorrections (bumps) created by dermal filling with hyaluronic acid.**

COMPOSITION

AQUA/WATER, HYALURONIDASE, MANNITOL

PRESENTATION

Each box contains 5 sterile vials of 1,500 I.U. solid lyophilized powder of hyaluronidase

HYALURONIDASE 1500 I.U. FILLER CORRECTION

REVERSING FACIAL HYALURONIC ACID FILLERS

CASE REPORT

INDICATIONS

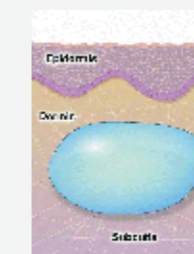

- Dissolves hyaluronic acid fillers
- Transport of cosmetic agents
- Hydrolipodystrophy grade III & IV
- Diffuses uncomplicated nodules and overcorrection associated with HA filler injection

AREAS INDICATED FOR USE

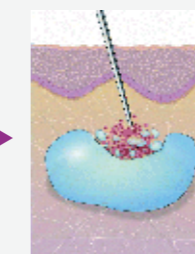

All areas where removal of the effects of hyaluronic acid fillers is desired

DISOLVIDASE® ACTION

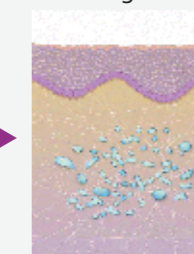

Hyaluronic acid filler

DISOLVIDASE®

Hyaluronic acid filler fragments

DIRECTIONS FOR USE

• *Reconstitute the product by adding 10 ml normal saline to a vial of DISOLVIDASE®. Agitate the vial to ensure the compound is mixed throughout the whole volume of saline. Make sure the powder is fully dissolved. This solution has a concentration of 150 units/ml, and it is ready for use. After cleansing the skin, apply approximately 0.05–0.1 ml reconstituted solution per 0.1 ml of filler to be dissolved in the center of the lumps or swelling. In cases of uncomplicated nodules involving periorbital, perioral, and nasal regions, use 5 to 15 units initially. For delicate areas such as the lower eyelid, apply between 1.5 and 3 units.*

The art of perfect hair

HAIR - RESTORATIVE TREATMENT

DQ HAIR+® is a groundbreaking new treatment that helps reactivate dormant hair follicles, leaving hair lush, strong, healthy, and shiny.

HAIR - GROWTH SYSTEM COCKTAIL

BIOTIN
+ PANTHENOL
+ PYRIDOXINE
+ THIAMINE
+ IRON [II]

DQ HAIR+®

DQ HAIR+® is a **hair-restorative solution**. Each vial contains a powerful combination of vitamin B complex (panthenol + pyridoxine + thiamine + biotin) and mineral salts, essential for revitalizing, protecting, and promoting hair growth. DQ HAIR+® is specifically **formulated to accelerate hair growth; it restores and increases local microcirculation in the scalp**. DQ HAIR+® provides nutritional input and slows the programmed process of follicular involution (stops hair loss). By reactivating the capillary formation process, it also speeds the formation of new hair follicles and provides them necessary nutrients. Panthenol (vitamin B5) acts as a precursor to coenzyme A (CoA), necessary for acetylation reactions. CoA is the cofactor of one of the most important enzymes of the intermediate metabolism; it acts as a cleanser for the scalp and hair follicles by reducing excess secretions of the sebaceous glands. The iron in gluconate salt plays an important role in the oxidative and hydrogen transport system of the hair follicle. Biotin (vitamin B7) stimulates the production of elastin, helps in the formation of fatty acids, and promotes healthy hair. DQ HAIR+® is a groundbreaking new treatment that helps reactivate dormant hair follicles, leaving hair lush, strong, healthy, and shiny.

COMPOSITION

AQUAWATER, PANTHENOL (PRO-VITAMIN B5), PYRIDOXINE HCL (VITAMIN B6), THIAMINE HCL (VITAMIN B1), SODIUM HIDROXIDE, BIOTIN (VITAMIN B7), DISODIUM EDTA, FERROUS GLUCONATE (IRON [II])

PRESENTATION

Each box contains 5 sterile x 10 ml/0.34 fl. oz. vials.

HAIR GROWTH SYSTEM RESTORATIVE COCKTAIL

AREAS INDICATED FOR USE

- On the scalp

BIOTIN (VITAMIN B7)

Boosts metabolism of fats, carbohydrates and proteins that are needed for thick hair and increased growth.

Increases hair elasticity
Increases hair density and volume

Increases survival rate of follicular grafts in post-hair-transplant recipients

THIAMINE

Is essential for efficient metabolism. Prevents nerve damage, so your hair cells (and follicles) can grow to any length desired.

IRON [III]

Plays an important role in the oxidative and hydrogen transport system of the hair follicle.

Is suitable for sensitive scalps and hypoallergenic

Helps stimulate growth of new hair

PANTHENOL (PRO-VITAMIN B5)

Especially helpful in rebuilding individual hair shafts, B5 works in combination with other nutrients to keep your hair strong, shiny, and resilient to breakage.

VITAMIN B6

Supports healthy hair growth because of its role in protein metabolism. Vitamin B6 also ensures that hair cells have access to the amino acids (building blocks of protein) needed to make hair proteins.

FUNCTIONAL PERFORMANCE

Reduces levels of testosterone that are converted to DHT. Controls affects of DHT on hair receptors. Specifically designed to target DHT, the hormone responsible for many female hair loss & hair thinning conditions.

CASE REPORT

DIRECTIONS FOR USE

To achieve the expected outcome, **DQ HAIR+®** mesotherapy requires a minimum of 2 sessions per week for 4 weeks, then 1 session monthly for maintenance.

• *The average volume used per session is 5–10 ml for the entire scalp. Apply over the entire scalp, section by section. DQ HAIR+® can be used in combination with BIOGINIX PRP. The cycle may be repeated on a monthly basis.*
